

CM1-C DESIGN REFERENCES

A technical line drawing of a servo motor assembly, showing various components like gears, shafts, and housing parts, rendered in a light green color on a dark green background.

The CM1 Cool Muscle line of servo motors provide all the common components required for motion control embedded into the motor itself. The seamless integration of both software and hardware components creates highly efficient motion modules that can be easily integrated into existing designs, or used to shorten the development cycle of your new machine.
